

CR800 Fitness Bike

The **CR800** Semi-Recumbent Bike is the perfect bike for the commercial environment. The step-thru design makes it easy for your clients to get on the bike, and the easy-adjust seat allows them to find the most comfortable position. The console offers multiple programs, most with 40 levels of resistance and enough feedback information to make sure your clients never grow bored of the **CR800**. The extra-smooth ride comes from the perfect gearing and the integrated generator/flywheel system.

Other design elements include:

- Contact & Telemetric heart rate capabilities to make the workout more effective
- Generator powered console means there is no need for electricity
- 2° of inversion at the padded foot pedals places the user in a comfortable, anatomically correct position
- High density foam pads for extra comfort during a long ride
- 40 levels of resistance to satisfy the needs of beginners or advanced exercisers
- C-safe Power and Communication capabilities for A/V control and virtual racing interaction with WebRacing® software

This model is very appealing to users that value a smooth ride and extensive data feedback. The console is identical to the **CU800** fitness bike & **CE800** elliptical trainer, which makes programming very familiar when using any Spirit Fitness C series products.

Easy-to-Adjust,
Comfortable Seat

CR800 Fitness Bike

As with any product, a major importance is the user interface. We focused on making everything easily accessible, convenient, and comfortable: A storage tray for a phone, keys, or an MP3 player; ergonomically friendly pulse grip posts for a more natural hand position, and a Turbo cooling fan to keep your clients cool and encourage them to workout longer.

A quick press of a button and your clients are off on a manually controlled ride or one of the many specialized workouts such as the Fit Test or Constant Power programs. Our large, bright LED console gives your clients constant feedback from calories to distance to time.
